DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Regarding claims 1-2, the phrase "may be" renders the claims indefinite because it is unclear whether the limitations following the phrase are part of the claimed invention. See MPEP § 2173.05(d).

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1, 2, 5-7, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by Hatmaker (US 3,871,145).

Hatmaker discloses a flashing for pitch pocket corner comprising a base portion 10 having openings in between, a top portion 11 connecting to the base portion 10 along opening in base portion, a break 23 in base and top portion is aligned and separating into first and second portions 13, a base flap portion denoted as "a" interposed between first and second of base portion, and extends from a bottom edge of top portion 10, (see figs. 3-5).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claims 3, 4, 9, 11 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hatmaker (US 3,871,145) in view of Gentry (US 4,625,469).

Hatmaker discloses the flashing for pitch pocket as stated.

Hatmaker does not disclose expressly the base and top portions are welded, having a cone shaped. Gentry teaches replacement flat roof insulation cover having a flexible membrane or boot including a base portion 60 and top portion 58 and having a cone-shaped (see figs. 9a, 9b). At the time of the invention, it would have been obvious to a person of ordinary skill in the art to modify and combine Hatmaker' invention with Gentry's teaching for a cone-shaped boot. The motivation for doing so would have been to provide more convenience for installers when they need for covering pipes or other applications with have the similar shape requirement.

Hatmaker and Gentry disclose the structural elements for covering protrusion a roof except for the base and top portions are welded together, examiner considers it is a method of forming a device and not germane to the issue of patentability of the device itself. Therefore, this limitation has not been given patentable weight.

Response to Arguments

Applicant's arguments with respect to claims 1-12 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Bullard (US 5,946,863), Zuares (US 5,832,675), Mayle et al. (US 6,110,311), (US 6,374,549), Humber (US 5,860,256), UK 2027469, DE 3603303.
